

PD1 named Child-Friendly Newspaper by Unicef, PPI

Manila, Philippines (PPI) — The Philippine Daily Inquirer (PD1) has been named a Child-Friendly Newspaper by the United Nations Children's Fund (Unicef) and the Philippine Press Institute (PPI). The award was presented to the newspaper during a ceremony held at the PPI headquarters in Manila on April 10, 2002.

The award recognizes the newspaper's commitment to providing accurate, timely, and accessible news to its young readers. PD1 has been recognized for its efforts in creating a safe and supportive environment for children to read and learn from the news.

The award was presented to the newspaper by Unicef and PPI officials. The award was presented to the newspaper by Unicef and PPI officials. The award was presented to the newspaper by Unicef and PPI officials.

Cagayan-Iligan rail project back on track

By Loren E. Reyes

THE PHILIPPINE National Railways Corp. (PNRC) has decided to resume work on the Cagayan-Iligan rail project, which was suspended in 1990. The project, which was approved by the Philippine Congress in 1988, will connect the two cities via a 100-kilometer rail line. The project was suspended in 1990 due to a lack of funds. However, the PNRC has now secured the necessary funds and has decided to resume work on the project. The project is expected to be completed by 1998.

Manila, April 25

The Philippine National Railways Corp. (PNRC) has decided to resume work on the Cagayan-Iligan rail project, which was suspended in 1990. The project, which was approved by the Philippine Congress in 1988, will connect the two cities via a 100-kilometer rail line. The project was suspended in 1990 due to a lack of funds. However, the PNRC has now secured the necessary funds and has decided to resume work on the project. The project is expected to be completed by 1998.

Tax break for foreign banks restored

By [Name]

The Philippine government has restored the tax break for foreign banks that was previously suspended. The move is seen as a positive step towards attracting foreign investment and improving the country's financial sector.

The tax break, which allows foreign banks to enjoy a 5% corporate income tax rate, was suspended in 2001. The government had hoped to use the revenue to fund infrastructure projects, but the suspension had a negative impact on the banking industry.

The restoration of the tax break is expected to encourage foreign banks to increase their operations in the Philippines, leading to job creation and economic growth.

STOP BAD BREATH NOW!

Bad breath is a common problem that can be embarrassing. There are many causes, including poor oral hygiene, diet, and medical conditions. Proper oral care and a healthy diet can help prevent bad breath.

3 provinces eyed for Comelec control

By [Name]

The Commission on Elections (Comelec) is considering the possibility of taking control of three provinces. The move is part of an effort to streamline the electoral process and ensure fair elections.

The provinces in question are [Names]. The Comelec has expressed concerns about the current state of the electoral process in these areas and believes that direct control is necessary.

The Comelec has been working to improve the electoral process across the country. This move is seen as a significant step towards achieving that goal.

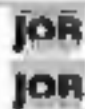

The move has received mixed reactions from the public and political groups. Some support the move, while others believe it is an overreach of power.

Lifestyle flunkers watched on poll expenses

By [Name]

The Commission on Elections (Comelec) is closely monitoring the expenses of candidates in the upcoming elections. The focus is on ensuring that candidates are not spending excessive amounts of money on lifestyle-related expenses.

The Comelec has set strict guidelines for campaign expenses. Candidates who violate these guidelines may face penalties. The goal is to ensure a fair and competitive electoral process.

JOB 2 EMPLOYMENT JOB 2 EXPO 2004

MAY 6 - 8, 2004 - Smokey Mountain Center

Come May, your dream job may well be within your reach.

The Inquirer Job Market hosts the largest and most extensive Employment Expo to date. With the participation of over 100 of the country's foremost and leading corporations, boundless job opportunities await you.

By simply coming, you will get the chance to:

- Input your resume directly into Resume Reserve database via our computers
- Receive free Job Market copies
- Submit your applications to a particular company (bring at least 10 to 20 copies of your resume)

So, mark your calendar for Job Market's three-day Employment Fair. That's May 6, 7 & 8 at the Smokey Mountain Center.

We hope to see you there!

For more details, visit us at www.inquirerjobmarket.com, or call one of the Inquirer branches.

There is a gap in the knowledge of the impact of the various factors on the development of the child. The gap is in the knowledge of the impact of the various factors on the development of the child. The gap is in the knowledge of the impact of the various factors on the development of the child.

The 2007-2008 season is the first time in the history of the program that the number of students who have completed a semester of the program is less than the number of students who have completed a semester of the program. The 2007-2008 season is the first time in the history of the program that the number of students who have completed a semester of the program is less than the number of students who have completed a semester of the program.

The first step in the process is to identify the problem. This involves gathering information about the situation and the people involved. Once the problem is identified, the next step is to analyze it. This involves breaking the problem down into its components and understanding how they are related. The third step is to develop a plan. This involves deciding on the best way to solve the problem and the steps that need to be taken. The fourth step is to implement the plan. This involves putting the plan into action and making any necessary adjustments. The final step is to evaluate the results. This involves assessing the effectiveness of the solution and determining if any further action is needed.

By Leonard P. Moore

It is not the case that the only way to achieve a more equitable distribution of income is through a more progressive tax system. The tax system is only one of the many tools available to the government to achieve its goals. The government can also use its spending power to provide social services, such as education, health care, and housing, which can help to reduce income inequality. The government can also use its regulatory power to ensure that the market is fair and competitive, which can help to create jobs and increase income. The government can also use its power to create a social safety net, which can help to protect the most vulnerable members of society. The government can also use its power to create a more equitable distribution of income through a more progressive tax system. Figure 1 is a schematic diagram of the experimental setup. It shows a reaction vessel (a beaker) containing a solution. A stirrer is placed in the solution. A thermometer is also in the solution. The reaction vessel is connected to a gas collection system. The gas collection system consists of a gas syringe and a water trough. The gas syringe is used to measure the volume of gas produced. The water trough is used to collect the gas, which is displaced by the gas from the reaction vessel. The diagram is labeled with various components and their functions.

18. **Answer: C** The correct answer is C. The correct answer is C. The correct answer is C.

The diagram illustrates a two-dimensional lattice structure. It consists of a grid of points. Arrows indicate the types of interactions between these points: solid arrows represent nearest-neighbor interactions, and dashed arrows represent next-nearest-neighbor interactions. The distance between nearest neighbors is labeled as 'a', and the distance between next-nearest neighbors is labeled as 'b'.

111. N. B. Krasovskii (18-1901) (Leningrad)

Clusia hirsuta was
synonymized with *C. rosea*.

Figure 1 is a line graph showing the effect of the concentration of the inhibitor on the rate of polymerization. The y-axis is labeled "Rate of polymerization" and ranges from 0 to 100. The x-axis is labeled "Concentration of inhibitor" and ranges from 0 to 1.0. The curve starts at (0, 100) and decreases as the concentration of inhibitor increases, reaching approximately 10 at a concentration of 1.0.

Informed choice

The first time I saw the book, I was struck by the way it was written. It was not just a collection of facts, but a story of a man who had lived through the most difficult of times. The author, a man of letters, had written this book with a sense of purpose and a deep understanding of the human condition. The book was a masterpiece of literature, and it was a pleasure to read it. The author's style was simple and direct, but it was also powerful and moving. The book was a testament to the human spirit, and it was a book that I would recommend to everyone.

Straw notes in the wind

Figure 1 consists of three panels, (a), (b), and (c), each showing the growth of *E. coli* O157:H7 on ground beef under different conditions. The y-axis for all panels is \log_{10} CFU/g, ranging from 0 to 10. The x-axis is time in days, ranging from 0 to 14. Panel (a) shows growth at 4°C. Panel (b) shows growth at 10°C. Panel (c) shows growth at 16°C. Each panel contains three sub-plots: (a) Control, (b) 100% RH, and (c) 100% RH + 100% RH. In all cases, growth is significantly higher in the 100% RH conditions compared to the control.

No need to import with hybrid rice, says DA

By Joyce M. Alvarado
 The Department of Agriculture (DA) has announced that the country will not need to import rice in 2001 because of the successful test of hybrid rice. DA Secretary Gen. Edilberto M. Diokno said that the country will be able to produce enough rice to meet its needs for the next year. He said that the country will be able to produce enough rice to meet its needs for the next year. He said that the country will be able to produce enough rice to meet its needs for the next year.

GMA orders probe of Rodriguez shooting

By Leo Tan, Manila
and Robert L. Llanes, Iloilo

MANILA, July 10 (AP) — GMA Network News, the country's largest private television news outlet, has ordered a probe into the shooting of a GMA news anchor, a GMA spokesman said today.

The spokesman said the probe would be conducted by GMA's internal security unit, which is headed by a former police officer. The spokesman said the probe would be completed by the end of the week.

The shooting took place on July 9 in Iloilo, where GMA's regional news anchor, Maria Rodriguez, was shot while on the air. Rodriguez was taken to a hospital and is expected to survive.

Pasig voters' list padded—Lakas

Bets want polls suspended

PASIG, July 10 (AP) — Lakas ng Bayan, the opposition party, has accused the Pasig City government of padding the voters' list for the upcoming local elections. The party's executive director, Betsi Betsi, said the list was inflated by 10,000 names.

Betsi said the list was padded by the city government to ensure the victory of the ruling party, the PDP-Laban. He said the list was inflated by adding the names of people who do not live in Pasig.

Betsi said the list was padded by the city government to ensure the victory of the ruling party, the PDP-Laban. He said the list was inflated by adding the names of people who do not live in Pasig.

ADB sees 4.5-5.5% growth for RP

By Steve C. Rowan

THE ASIAN DEVELOPMENT BANK (ADB) has projected that the Philippine economy would grow by 4.5 to 5.5 percent this year, down from 6.5 to 7.5 percent last year.

The ADB's latest report, released last week, says that the Philippine economy is expected to grow by 4.5 to 5.5 percent this year, down from 6.5 to 7.5 percent last year.

Year	GDP Growth (%)
2005	6.5-7.5
2006	4.5-5.5

When you're considering whether to buy a product, the first thing you should do is check the ingredients. Most consumers are quick to do this, but many are not so quick to check the product's health benefits.
